Professional Summery

Detail-oriented administrative and records management professional with extensive experience in regulated, high-volume environments. **Certified NYS 55-b Eligible Candidate** specializing in public service operations, strict policy compliance, and data confidentiality. Proven accuracy in executing precise data entry, document preparation, and cross-functional coordination across complex office systems.

Core Competencies

Expert in public service operations, data entry, records keeping, and processing transactions. Proficient in high-volume keyboarding, document preparation, compiling informational reports, and customer assistance. Skilled in policy compliance, absolute data confidentiality, SOP adherence, and **bilingual communication**. Advanced in **Microsoft Office Suite** and **Google Workspace** workflows.

Professional Experience

PSE Mail Processing Clerk United States Postal Service | Albany, NY |
September 2022 – July 2024 (40 hours per week)

- Processed transactions and routed exceptionally high volumes of time-sensitive official correspondence, packages, and mail within a secure, structured federal facility.
- Performed continuous database data entry and records keeping tasks, reviewing, editing, and organizing digital database contents to streamline records workflows and ensure data integrity.
- Executed daily high-volume keyboarding and document preparation tasks, ensuring complete layout accuracy, federal compliance, and strict adherence to organizational standard operating procedures.
- Maintained records with meticulous attention to detail, handling sensitive official documentation while maintaining strict data privacy protocols and absolute confidentiality guidelines.

- Delivered essential cross-functional administrative support, assisted customers, resolved service-related challenges, and compiled operational data to meet strict distribution deadlines.

Production Technician Plug Power Inc. | Latham, NY | March 2021 – January 2022 (40 hours per week)

- Monitored and coordinated workflows within a highly regulated, technical manufacturing environment, strictly adhering to corporate safety guidelines and standard operating procedures (SOPs).
- Completed detailed documentation tasks, maintaining records, verifying quality control metrics, and preparing daily data logs, technical test spreadsheets, charts, graphs, and tables.
- Managed and maintained records for independent operational platforms, compiling information from thorough data research to systematically generate structured status reports.
- Provided cross-functional administrative support to engineering and production units, tracking raw material inventories and balancing competing production deadlines under tight windows.

Technical Skills Inventory

- **Office Productivity:** Microsoft Word, Microsoft Excel, Microsoft Outlook, Google Docs, Google Sheets, Google Drive, and digital calendar systems.
- **Workflow Tools:** Advanced utilization of artificial intelligence tools for text generation, in-depth research, data compilation, and script editing.
